Target version:		Spent time:	0.00 hour

Description

The screenshot shows the qEhgraph software interface. The main window displays a 33KV power diagram titled '横沥站33KV一次图'. A '属性设置' (Property Settings) dialog box is open, showing the '基本属性' (Basic Properties) tab. The '闪烁设置' (Flash Settings) section has the following options:

- 无闪烁
- 状态触发闪烁
- 状态变化闪烁
- 运行脚本触发闪烁

The '运行脚本触发闪烁' option has a '脚本链接' (Script Link) field next to it, which is highlighted with a red arrow. The '控制画面' (Control Panel) section has the '无' (None) option selected.

Text at the bottom of the screenshot: 脚本链接不可选，只有勾选上运行脚本触发闪烁才可以打开，旧版是无闪烁也可以打开脚本链接的
